Your excellency, ambassador of USA, Mr. Rodolph Valee!

We welcome with great joy that you publicly introduced your grand idea, which discriminates nobody according to own religious persuasion, to be representative of the greatest religious organisation in Slovakia.

After the fall of the communist regime, we expected that we will follow our great ideal, a founder and guarantee of modern democracy in the world - your country USA.

We were very disenchanted and disappointed about the law of registration of churches in Slovakia which was accepted after the fall of the regime. It gives a very advantageous position to religious majority and to these churches, which served to denounce communist, atheistic and totalitarian regimes. This law precludes registration of churches which could not be registered in the communist regime and they do not benefit society.

It is known, that the first colonies in North America were founded by Christians who were expelled by illiberal religious politics and tyranny of the ruling class in Europe. They established USA as a cradle of democracy, freedom, free market and open society.

We appreciate the idea which has been represented to the whole world by USA for few centuries and we thank you that the idea of "Pilgrim Fathers" who came to a free country to establish "the town built on the hill", "the lighthouse of freedom of faith and persuasion", a country where all people, which were created by God, were equal and every man had sanctioned rights of life, freedom and the search of own happiness. That is expressed in the Declaration of Independence in USA which was worked out by Thomas Jefferson between the 11th and 28th June 1776. You publicly disseminated and supported this idea according to the founders of USA.

In spite of that media presents this reality as your effort to find support for registration of Mormons, we dare to believe that this your presentation was the same that you presented - introduction of the idea of open society which discriminates nobody according to own persuasion. We sincerely thank you from our heart for this in the name of all that were oppressed, discriminated, pushed to the periphery of our society, nay criminalized by the state's side and the state's religious organisations.

Your open presentation (extremely worth) was one of the first (or it can be only) in our country with similar content.

It performs to us as gulp of refreshing water after 16 years oppression, defamation, slandering, marking as American sect, medial attacks which was nurtured from religious majority and ex-comunistic officials who build a new career in churches which is economically depended to state.

Your modest presentation was glimmering which possibly open the eyes to a lot of people and help them see the real position of things in Slovakia. We believe that you will forward affect to more democracy in our society by importance of your personality and to reach down in the law´s specified number of persons needed to registration of churches and religious societies.

We knew that there is a long way before us to real democracy and we believe that our effort about introduction of Biblic Christian belief was not and is not needless although we sociably had to pay a big price with reach to our person´s lives and we must pay to present.

Also your voice encourage us to contribute to more democracy in our country by own effort according to ideal of your country. We thank you once more to your public presentation of your opinion and idea of open society and we thank you for application and change of law about registration of churches and religious societies in Slovakia.

We bless your work, we pray for you and for your country which is guarrantee of freedom, democracy and safety in whole world.

God bless you!

The founder and preacher  
of Christian Mission Center OASIS OF FAITH, Gócze Mikuláš
